CERC 2023
Call for Papers
Version 1.5 from May 15, 2023

The 8th Collaborative European Research Conference (CERC 2023)

Universidad Autónoma de Barcelona (UAB), Barcelona, Spain.

June 09 – 10, 2023

www.cerc-conf.eu

Call for Papers

The multidisciplinary Collaborative European Research Conference (CERC) is an annual event that takes place since 2011 when it was initiated by University partners across Europe. It brings together researchers from a wide range of disciplines in order to foster knowledge transfer, inter-disciplinary exchange and collaboration.

We invite researchers to submit extended abstracts or full papers and to attend the conference. We especially welcome early stage researchers to present new research topics.

To support the range of options, and flexibility needed in the current situation, we will offer a hybrid conference experience. You do not need to commit either to a place-based or virtual presentation at the time of submission.

We invite the submission of long (10 pages) and short (6 pages) papers on substantial, original, and unpublished research in all aspects of computer science, biology, bioinformatics, business information systems, marketing, IT-security, civil engineering, education, psychology, law, multimedia, art, etc.

Contributing students came from Ireland, Germany, England, Wales, Northern Ireland, Norway, France, Spain, Greece, Turkey, India, USA, UAE, etc.

Accepted contributions will be published in digital proceedings with an ISSN number – it is intended that publications shall be submitted to CEUR-WS for online publication, indexed among other at DBLP, Scopus, Semantic Scholar and Google Scholar. A prize for the best paper and best presentation will be awarded during the conference closing on June 9, 2023.

CERC 2023 has the goal of a broad research program. Relevant topics for the conference include, but are not limited to, the following areas :

- eHealth
- Natural Language Processing and its applications
- Internet of Things
- Networks
- Robotics
- Sensors and wireless temperature measurements
- Data Computing and Artificial Intelligence
- Business and Society
- Politics and Public Policy
- Law
- Visual Computing and Data Analytics
- Cybersecurity and Cybercrime
- Bioinformatics and Biomedicine
- Education

Submission

Submission is electronic, using the EasyChair conference management system. The submission site is available at :
https://submission.cerc-conf.eu

As the reviewing will be blind, papers must not include authors' names and affiliations.

Important Dates

Submission deadline (short and full papers) : May 7, 2023

Notification to authors : May 15, 2023

Submission of camera ready papers : May 29, 2023

Author registration deadline : May 21, 2023

Late registration deadline : May 29, 2023

Conference : June 9 – 10, 2023

Conference registration fees

- Author and Guest Registration : 200 € / Late Registration : 250 €
- Student Registration : 150 € / Late Student Registration : 200 €

Registration

https://registration.cerc-conf.eu

All accepted papers must be presented at the conference to appear in the proceedings. Authors of papers accepted for presentation at CERC 2023 must notify the program chairs by the camera-ready deadline if they wish to withdraw the paper. At least one author of each accepted paper must register for CERC 2023 by the author registration deadline.
